COLLECTION 2025

ABOUT US

Set up in 2018 Wellvit Bathware has in a very short span of time emerged as one of the Eminent Manufacturers of Ceramic Sanitaryware and Bathware Products in India. Wellvit offers a wide and Extensive range of Bathware Products. The Organisation is founded and managed by well qualified professionals who possess unmatched experience and expertise to manufacture international quality Bathware Products.

QUALITY

All Wellvit products are manufactured in our state of the art plant with stringent quality norms. Wellvit provides smart and sustainable designs combined with aesthetics and innovation. Our products are manufactured using the most advanced technology and processes to stand the tests of time.

A JOURNEY DEFINED BY INNOVATION

OUR MILESTONE

2018

ROOTED IN 2018 : CRAFTING OUR LEGACY

We embarked on a journey to create Wellvit brand driven by passion, innovation, and a commitment to quality.

2020

ADVANCED PRODUCTION CAPABILITIES IN 2020

With a focus on innovation, we increased our production capacity to 36,000 units, ensuring consistent quality and efficiency.

2022

TAKING OUR PRODUCTS WORLDWIDE IN 2022

We proudly began exporting our products, marking our entry into international markets with quality and trust.

2024

A NEW CHAPTER IN 2024 : FAUCETS LAUNCHED

We introduced our faucet range, setting new standards and blending superior craftsmanship with modern design aesthetics.

VISION

To exceed our customers' expectation in designs, quality, logistics, Pre & after sales service, cost through R&D and continuous improvement and customer interaction.

MISSION

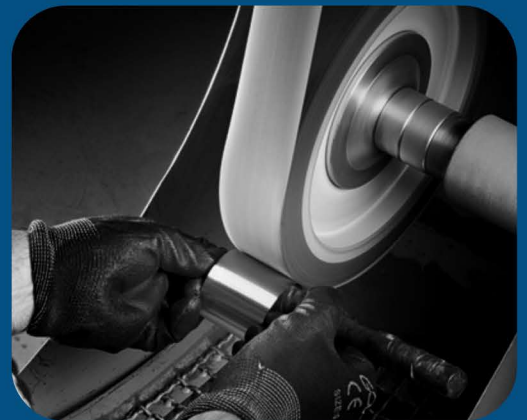

We are setting a goal to meet our vision of being the most recognized brand in bathroom solution providing international quality products at affordable prices across the globe to make homes better and lives happier.

VALUES

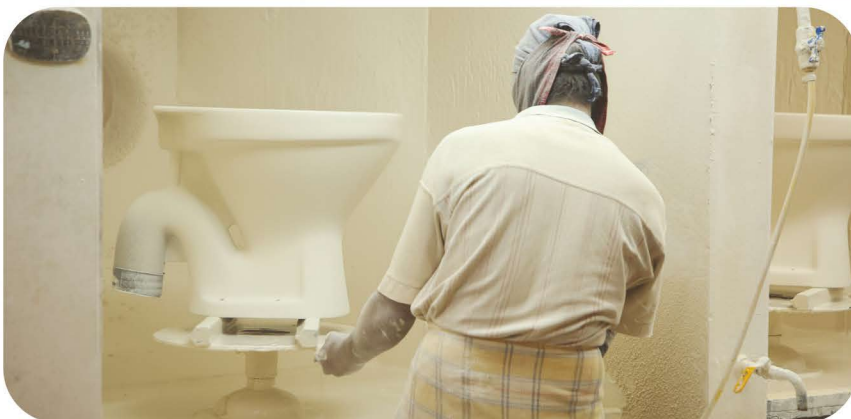

Integrity and compassion are the cornerstones of our approach. We lead by example, fostering a culture of continuous learning and innovation. Our core values guide us towards achieving collective growth and shared success.

FAUCET PRODUCTION UNIT

Take a glance at our faucet production unit, where craftsmanship flows with perfection. Using modern machinery and automated systems our faucet manufacturing team is a blend of skilled professionals and industry experts. From sleek modern designs to timeless classics, We design faucets that are not only stylish but also built to last. Elevate your water experience with our premium range.

SANITARYWARE PRODUCTION UNIT

Step into our sanitaryware production unit, where creativity meets cutting-edge technology. With advanced manufacturing techniques and strict quality controls, Our proficient workforce delivers sanitaryware that exceeds expectations. Every product is crafted with care, ensuring durability and aesthetic appeal. Transform your spaces with our timeless designs and reliable quality.

Particulars	I.S.I Requirement	Our Value
Water Absorption	0.50%	<0.20%
Modulus of rupture (breaking strength)	600 kg/sq.cm	650 To 700 Kg./sq.cm
Crazing Resistance (steam Pressure Of 3.7 Kg/sq.cm For 4 Hrs.)	No crazing upto two cycles	No Crazing Upto Four Cycles
Minimum Thickness	Should be mini. 6.0 mm at any place	Mini. 7 mm At Any Place
Warpage	The appliance should not Show warpage more Than the specified limits.	Warpage Well Within The Permissible Limits.
Thickness Of Glaze At any Place	Not specified	Mini. 400 Microns (that Is 0.4 mm)
Surface Quality	No wavy finish on the visible surface	No Wavy Finish
Discolouration	None on the visible surface	None On The Visible Surface
Resistance To Chemicals	Should be resistant to all House hold chemicals	Passes
Resistance To Stains And Burns.	No stain should remain On testing	Passes

TIPS & CARE

Wellvit's cleaning and Maintenance Tips to keep clean your bathroom might seem like a mean task, but if done regularly it will keep the bathroom not only clean but also germ free.

GENERAL MAINTENANCE TIPS

- The bathroom should be cleaned once a week and even more frequently if you are a large family.
- Make it a firm rule in your home to rinse out the tub or shower stall immediately after you use it.
- To discourage mildew growth in the bathroom, increase air circulation and light to decrease moisture.
- Always start cleaning the bathroom from the top and work your way to the floor.
- Install and properly maintain dehumidifiers, vents and exhaust fans
- After handling soapy cleansers and cleaning solutions please make sure you wash your hands clean and wipe them dry.
- Ensure you wipe the bathroom floor dry with the help of a wiper every time after a bath, to prevent slipping and falling.
- Ensure that all electrical appliances in the bathroom, are installed away from direct sources of water

WASH BASIN

The wash basin is the most frequently used sanitary ware in the bathroom. It is important that it is kept clean at all times to insure it is bacteria free. It is advisable to gently scrub it clean after every use, or at least once a day. Readily available cleansers can be used. Even soap solution works well, but would require some scrubbing. Using an antiseptic solution is a good idea

TAPS & FIXTURES

- Avoid using strong cleaning agents to clean taps and other metal fixtures like shower units and knob, these may damage not only the surface coating & affect the working of the product.
- Use mild cleaning to clean taps and other fixtures. Instead spray cleaner and rinse thoroughly with water
- Avoid using acids and bleaches of any kind as these can lead to significant damage
- A simple eco-friendly cleaner can be used safely for cleaning metal fixtures. Spray & let it remain on the faucet for 5 minutes and then wipe clean with a damp cloth.
- Inspect the taps for remaining stains, scum or grime. If more cleaning is needed, fill a plastic bowl with 1/2 cup of baking soda and 1/4 cup of white Vinegar. Scrap the tap with a nylon scrub to loosen dirt particles and wipe with a soft damp cotton cloth. Finally, wipe the taps dry for a sparkling finish.
- It is also essential to keep the drainage pipes clean to prevent clogging. At least once a month clean up the drains to keep them free of grease, dirt, and hair. The mixture will foam up. Let stand for a few minutes then pour boiling water down the drain to wash down any clogging.
- To clean clogged showerheads, fill a plastic bag with undiluted white vinegar & submerge the showerhead in it. Secure the bag with a rubber band and leave it to soak overnight. The next day, scrub the shower with a toothbrush and wash it clean..

GENERAL INSTRUCTIONS

To preserve surface finish and aesthetics of your bath fittings.

- Clear the fittings regularly with a moist cloth, normal soap water / diluted vinegar and put it dry. Use chalk powder to remove scaling/stains.
- Do not use scrubbers, harsh washing powder, phenyl or harsh cleaning chemicals.
- While fixing, do not scratch/damage the fittings by means of tools or spanners.
- Cover the fittings after they have assembled. Keep Fittings regularly & rigorously maintained in case of poor water quality.
- Continuous usage of air fresheners, deodorants, after shave etc. in bathroom with poor ventilation. will affect the gloss & finish of the fittings over a period of time.
- Aerators & flow regulators of faucets & mixers have to be cleaned regularly to remove accumulation of salts/minerals, dirt/impurities.
- Leftover of building materials, dirt/impurities to be flushed out from the plumbing line before fixing the fitting.
- For ideal working of plumbing fixtures, minimum & maximum water pressure should be 0.7 bar to 2.5 bar respectively
